Evolve

Yarn created with natural colours.
Creativity meets quality as we continue to push
boundaries inventing new ideas and approaches.

BRIGHT COLOURS KEEP IT NATURAL

The PET bottles collected at the centers are separated by colour. Once sorted, the green and brown bottles are transformed into flakes. No chemicals are used to make these yarns as the natural colours of the bottles provide the necessary hue. Neither is any form of dyeing used or required. Based on availability of bottles.

Potential Benefits:

- Energy and water consumption usage at lowest levels
- Highest color fastness
- Due to unique features no pigments and dyestuff used
- Natural color of the bottles evident in the yarn

END USES: _____

Outdoors

Apparel

Automotive

Footwear
