

ECOS Shield

Minimizing direct exposure to ultraviolet rays makes wearing more comfortable and cool, providing the best sun protection and shade

Determination of UPF Rating (AATCC 183 - 2014)
Percent UV - Blocked 99.86%
Percent UV - Blocked 99.95%

FOR HEALTHY SKIN AND LONG-LASTING PERFORMANCE

Exposure to ultraviolet radiation (UV) is considered dangerous and can damage your skin.

The properties of our ECOS Shield yarn provide unique and excellent UV shielding, protecting the wearer's skin against any harmful UV light. Preventing direct sunlight and blocking UV rays offers coolness to the skin leaving it well cared for.

Potential Benefits:

- An impressive 50+ UPF (Ultraviolet Protection Factor) blocks nearly 98% of the sun's rays providing excellent protection against UV rays
- Provides both wet and dry UV protection
- Can be combined with other ECOS proprietary technologies or finishes for additional benefits
- 'Cotton like' touch and feel where texture is similar to cotton
