RECYCLING TEXTILE WASTE
INTO YARN

**ZERO WASTE
TO LANDFILL**

REVOLUTIONIZING TEXTILE WASTE INTO SUSTAINABLE YARN

Discover how innovative recycling methods are transforming discarded textiles into eco-friendly yarn, ushering in a sustainable revolution in the fashion and textile industry.

Potential Benefits:

- Solution acts against the second most polluting industry in the world - Textile waste
- Ensures a zero waste-to-landfill process
- Current capacity converts Polyester fabric with 10% Spandex into yarn
- Natural stretch yarn
- Corresponds with EU's circular economy initiatives
- Prolongs lifespan of discarded textiles
- Circular economy reduces reliance on raw materials, as a portion is sourced from textile waste

Suggested end use:

- Back yarn, Terry loop/ Brush fabric
